Paradyż Group stands for more than 25 years of experience in design, manufacturing and selling of ceramic tiles. A diverse product offer directed at many different tastes and expectations – knowledge of the market and the dynamically developing sales network encompassing nearly 40 countries worldwide, the trust and regard of our customers have had a direct influence on the current position of our company as the most important representative of the ceramic tile industry branch in Poland.

We created a consistent, recognizable style which is unique in its design innovativeness, care for each detail of our workmanship as well as a diverse selection of complete collections of decorative elements for walls and floors in many different size (cm). Thanks to this, we help our customers worldwide to arrange their own interior living space according to their own, highly individual taste.

World class design goes hand in hand with innovativeness in manufacturing technology – in the course of more than two decades, we have implemented numerous solutions – among others we were the first manufacturer in Poland, and one of the first in the world, to use the tile decorationating technology that utilizes digital print, allowing us to achieve highly detailed and accurate rendering of design patterns.
